Re: Request for Modification of Jorgensen Forge Early Action Area Removal Action and Jorgensen Forge Outfall Site Removal Action Boundaries.

Mr. Ernst, Mr. Leon and Mr. Dyer:

In a letter dated March 25, 2014, The Boeing Company, Earl M. Jorgensen Company, and Jorgensen Forge Corporation ("Parties") requested written confirmation from the U.S. Environmental Protection Agency on a proposed boundary modification between the Removal Actions at the Jorgensen Forge Early Action Area (CERCLA Docket No. 10-2013-0032) and the Jorgensen Forge Outfall Site (CERCLA Docket No. 10-2011-0017).

The Parties' propose to add 97 ft² of upland contained within the Jorgensen Forge Early Action Area removal action boundary to the Jorgensen Forge Outfall Site removal action boundary. The EPA accepts the removal action boundary modification for each site, which can be found in greater detail in the attached Figure 1.

The EPA understand the basis for this modification is due to concerns associated with the constructability and construction worker health and safety that the Parties identified during the removal action design for the Jorgensen Forge Early Action Area. The EPA also understand that the removal details for these 97 ft² of uplands now within the Jorgensen Forge Outfall Site will be further developed in a pending third modification to the existing Administrative Order on Consent (CERCLA Docket No. 10-2011-0017). Please contact me if you have any further questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Shawn Blocker", written over a horizontal line.
